D&B DUNS REGISTERED™
WITH TOP RATING

China's eSIM Infrastructure Expansion: Strategic Partnerships and Telecom Operator Dynamics

- China's eSIM market is projected to grow from \$13.54B in 2024 to \$31.82B by 2030, driven by 5G, IoT, and government digitalization efforts.
- Telecom operators face challenges in standardizing infrastructure while adapting to Apple/Huawei's eSIM-enabled devices and global interoperability demands.
- Fragmented adoption and security risks persist, but iSIM technology offers cost reductions and efficiency gains for IoT/wearable applications.
- Investors should prioritize operators addressing interoperability gaps and leveraging China's 5G rollout for long-term smart city/IoT value creation.

The global eSIM market is undergoing a seismic shift, and China stands at its epicenter. By 2025, the Asia-Pacific region—led by China—is projected to dominate eSIM adoption, with the market valued at USD 13.54 billion in 2024 and expected to surge to USD 31.82 billion by 2030. This growth is driven by the proliferation of connected devices, 5G infrastructure, and the digital transformation of industries. For Chinese telecom operators, the expansion of eSIM infrastructure represents both a strategic opportunity and a complex challenge, particularly as global tech giants like Apple, Samsung, and Huawei increasingly shape the ecosystem.

Market Drivers and Strategic Imperatives

China's eSIM market is fueled by three key factors: consumer electronics innovation, industrial

IoT adoption, and government-backed digitalization. According to a report by Mobilise Global, the Asia-Pacific eSIM market is forecasted to grow at a compound annual growth rate (CAGR) of 15.27% from 2024 to 2030. This is underpinned by the integration of eSIMs in smartphones, wearables, and automotive systems. For instance, over 65% of new smartphones launched in 2024 support eSIM technology, a trend that aligns with Apple's and Huawei's product strategies in China.

Telecom operators are adapting by prioritizing remote provisioning and multi-carrier support, which are critical for IoT and wearable applications. As stated by Market Data Forecast, eSIMs enable seamless network switching and reduce logistical costs associated with traditional SIM cards. This shift is particularly

relevant in China's automotive sector, where eSIMs facilitate over-the-air (OTA) updates and connected infotainment systems.

The Role of Tech Giants: Indirect Collaborations and Ecosystem Influence

While direct partnerships between Chinese telecom operators and Apple remain opaque, the broader ecosystem reveals indirect synergies. Apple's eSIM-enabled devices, such as the Apple Watch and iPads, have spurred demand for eSIM-compatible networks in China. Similarly, Huawei's dominance in 5G infrastructure and consumer electronics has positioned it as a key player in eSIM integration. According to Business Research Insights, global tech firms are leveraging China's manufacturing capabilities to scale eSIM adoption, particularly in IoT and smart city projects.

The absence of explicit Apple-China telecom collaborations does not diminish the sector's potential. Instead, it highlights the standardization of eSIM infrastructure as a global priority. For example, China's telecom operators are aligning with international standards to ensure interoperability, a move that indirectly benefits tech companies like Apple by creating a unified ecosystem.

Challenges and Opportunities

Despite rapid growth, the eSIM market faces hurdles. Fragmented operator adoption, regulatory compliance, and interoperability issues remain significant barriers. For instance, inconsistent remote provisioning infrastructure in certain regions hinders mass adoption. Additionally, security concerns tied

to cloud-based subscription management expose vulnerabilities in eSIM ecosystems.

However, these challenges also present opportunities. The transition to iSIM (integrated SIM) technology, which embeds SIM functionality directly into a device's processor, promises reduced costs and improved efficiency for IoT and wearable applications. Chinese telecom operators that invest in iSIM infrastructure early could gain a competitive edge.

Investment Implications

For investors, the eSIM landscape in China offers a dual opportunity: infrastructure development and ecosystem integration. Telecom operators that partner with tech companies to address interoperability and security gaps will likely outperform peers. Additionally, the rise of IoT and smart city projects—supported by China's 5G rollout—creates long-term value for stakeholders.

A data visualization of China's eSIM market growth from 2023 to 2030 would highlight the following trends:

Conclusion

China's eSIM infrastructure expansion is a testament to the country's digital transformation ambitions. While direct collaborations between telecom operators and tech giants like Apple remain unconfirmed, the broader market dynamics—driven by IoT, 5G, and global tech innovation—underscore a clear trajectory. Investors should focus on operators that prioritize interoperability, security, and cross-sector partnerships, as these will define the next phase of eSIM adoption.

Sony Reimagines its 10 Series with Xperia 10 VII

Sony announces the redefined 10 series smartphone '10 VII', its refreshed, elegant and sophisticated design brings together a host of upgraded features.

Quick shooting with 'Shutter button' for enhanced camera functionality

The dedicated 'shutter button' located on the side of the smartphone actions both launching the camera app and taking photos with a single press. Even when the screen is locked, long-pressing the button instantly launches the camera app so you never miss important shots.

Capture bright and clear image quality especially in low-light scenes, thanks to the new larger sensors. The 16mm lens is equipped with a 1/3-inch sensor, and the 24mm lens features a newly installed 1/1.56-inch sensor, approximately 1.6 times larger than the previous model.

The two rear camera lenses support three focal lengths (16mm/24mm/48mm) for versatile camera shots; cover the whole scene from a 16mm ultra-wide, a wide 24 mm, and get closer to your subject with a 48 mm zoom.

Made for the Future with Long-life Battery and Improved Processing Speed

Xperia 10 VII is equipped with a battery that can last for two consecutive day, providing peace of mind during long day trips or when regular charging isn't possible. The unique "Adaptive charging" prevents battery degradation even after four years of use so you can be confident your 10 VII will stand the test of time.

Xperia 10 VII supports six years of security updates and up to four OS version upgrades, allowing for long-term use.

To avoid lag and keep pages and videos loading smoothly, it is also equipped with Qualcomm's Snapdragon® 6 Gen 3 chipset which improves processing speed.

Xperia 10 VII comes with Circle to Search with Google and Google Gemini

Instantly search anything you see on your phone with Google. Circle, highlight, scribble, or tap any image, video, or text to search, without switching apps. Quickly get the

info you need, then get right back to what you're doing.

Chat with Gemini, an AI assistant from Google to supercharge your ideas. It can help with writing, planning, learning and more. You can also talk it out Live with Gemini to brainstorm ideas, simplify complex topics, and rehearse for important moments with real-time responses. Instantly access Gemini on your Xperia 10 VII by pressing and holding the power button.

Immersive Display and Advanced Audio Performance for Enhanced Content Viewing

A new 19.5:9 aspect ratio makes watching content and browsing the internet more comfortable. Plus, because it supports a 120 Hz refresh rate, the display and scrolling are extremely smooth. The newly designed front-facing speakers with reduced cabinet vibration suppress noise and reproduce richer, deeper sound quality with enhanced bass and mid-bass ranges.

The Bluetooth® transmission power has been doubled compared to the previous model to ensure an even more reliable connection. Additionally, during AAC (Advanced Audio Coding) connections, the device temporarily adjusts the sound quality to prioritise connectivity in crowded or unstable environments, allowing users to enjoy content viewing regardless of location.

Lightweight Body and Sophisticated New Design

The Xperia 10 VII is reimagined from the ground up. The new form factor is light (168g), sleek, and reshaped for better viewing with a new display and more comfortable handling. The rear design has been revamped by changing the camera layout and utilising a smooth-to-the-touch coating, achieving both a sense of unity in the camera area and a matte texture.

The display uses Corning® Gorilla® Glass Victus®, a highly drop-resistant and scratch-resistant glass, ensuring durability for further peace of mind.

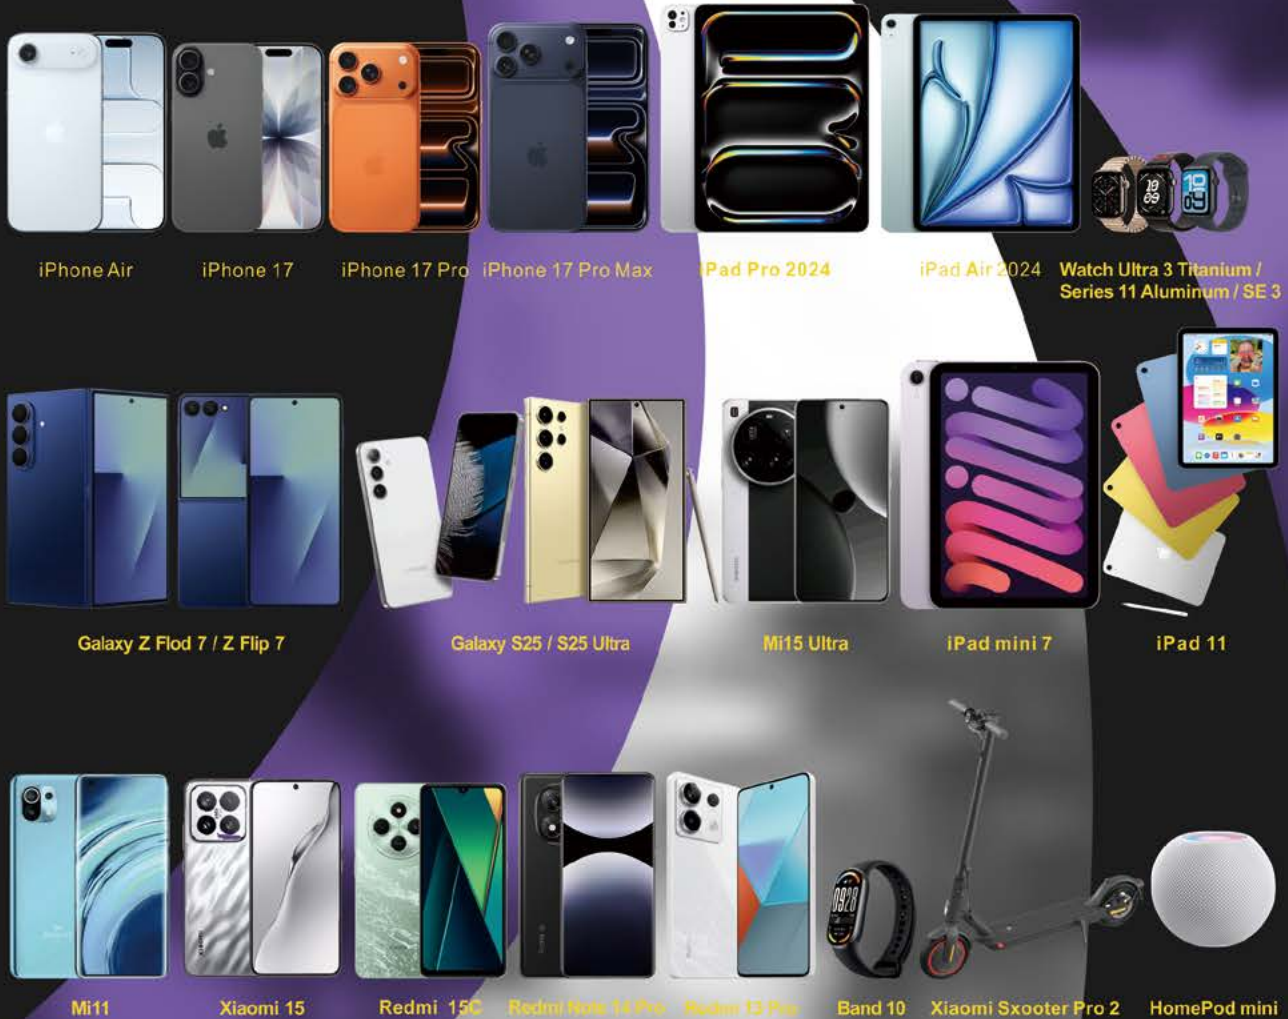

By combining Xperia 10 VII with the cover (sold separately), users can enjoy their own unique arrangements by inserting their favourite stickers and photos.

Environmental Initiatives

Sony's original blended material is used for the product box and main unit tray, achieving zero plastic usage in individual packaging. Approximately 77% of the raw materials for some of the components used inside and outside the main unit are environmentally friendly resins (recycled resins and plant-derived resins), including the environmentally friendly plastic SORPLAS™.

➤ Samsung launches Galaxy XR multi-modal AI headset

Samsung releases the Galaxy XR for \$1,799, featuring an Android XR platform to challenge Apple's Vision Pro.

The mixed reality device Galaxy XR is aiming to "unleash the full potential of multimodal AI." With Google's artificial intelligence and content ecosystem, as well as Qualcomm's computing chips, this new headset will take on Apple's Vision Pro.

This is also the first headset powered by the Android XR platform - XR is a platform developed by Google specifically for smart glasses and headset devices. The device is equipped with Qualcomm's Snapdragon XR2+ Gen 2 headset chip, with a 20% improvement in CPU performance and a 15% improvement in GPU performance compared to the previous generation.

Samsung claims that Galaxy XR can achieve almost all the functions of Apple's Vision Pro: The Micro OLED display of the Samsung headset has 29 million pixels (6 million more than Apple's Vision Pro), a resolution of 3552×3840, and covers 96% of the DCI - P3 color gamut - 4% higher than Vision Pro. However, in terms of refresh rate, Galaxy XR supports a maximum of 90Hz, while Vision Pro can reach up to 120Hz.

The device has all the functions provided by Apple, such as high-definition see-through cameras, eye tracking, gesture tracking, and iris biometrics. Samsung also offers a pair of XR hand controllers, but they need to be purchased separately.

Most importantly, even after installing the forehead visor, the total weight of the Galaxy XR is only 545 grams, while the newly upgraded Vision Pro last week can weigh up to 800 grams.

As Samsung's ambitious attempt to enter the "spatial computing" market, the Galaxy XR is priced at \$1,799 (approximately RMB 128,000). Although the price is obviously not cheap, it still shows cost-effectiveness compared to Apple's \$3,499 competitor. This product has been launched in the US and South Korean markets and will enter more countries in the future.

Shahram Izadi, head of Google XR, said that the partners set such a price to "make it affordable for as many people as possible."

AI and Content Ecosystem as Backing

Similar to Apple, the current core use of Samsung's XR device

is also audio - visual entertainment. However, the difference is that Samsung has Google behind it, and Google has world - class AI applications.

According to Samsung, this device has two major content application partners, Netflix and Google YouTube. As a cool new feature, the Samsung headset can use AI capabilities to "spatialize" 2D streaming media and local videos, adding a sense of depth to the videos and thus enhancing the immersive experience.

Samsung also repeatedly emphasized the AI functions of this headset at the press conference.

After enabling the AI function based on Google's Gemini live feature, users can share everything in their field of vision with artificial intelligence, including external images and applications and videos running inside the system, and interact with AI in real - time.

For example, after putting on the headset, users can draw a circle around an object in the real world (or any content on the screen) with their fingers to retrieve relevant information, and in some cases, a shopping page will also be displayed.

Or when watching live sports events or playing games, users can ask AI any questions related to the content in front of them in real - time, such as "How to play this game?"

To support the launch of this niche new product, Google has also launched the "Buy Samsung XR, Get Google Suite for Free" campaign.

For users who purchase this device before the end of this year, Samsung and Google will give away a digital content package called the "Explorer Pack," which includes a 12 - month subscription to Google AI Pro, YouTube Premium, Google Play Pass, and a 3 - month subscription to YouTube TV at only \$1 per month. In addition, US users will get the NBA League Pass for the 2025 - 2026 season, and South Korean users will get the local sports subscription service Coupang Play sports pass, which also includes NBA live broadcasts.

According to calculations, the market value of these launch packages exceeds \$1,000, clearly showing Samsung and Google's ambition to challenge Apple head - on.

➤ Apple Reportedly Cuts iPhone 17 Air Output, Boosts Base Model by 5M Units

The iPhone Air is part of Apple's new iPhone 17 lineup, featuring an ultra-thin design as its standout feature. However, the experiment ap-

Email: narain.nec@icloud.com

appears to have fallen short, with reports indicating disappointing sales. According to Nikkei, sources indicate that Apple is sharply reducing production orders for the iPhone Air while increasing output for other iPhone 17 models, driven by strong overall demand for the lineup.

As the report notes, citing sources, Apple's production adjustments reflect the iPhone Air's underwhelming reception in markets outside China, where it was only launched last week. Production orders for the model have reportedly been reduced to nearly "end-of-production" levels.

Under the original production plan, the iPhone Air was expected to make up about 10% to 15% of total new iPhone output this year. However, sources cited in the report indicate that from November onward, production orders for the model will fall to less than 10% of September's volume.

Though its sales have been weaker than expected, the model still plays a key role in paving the way for Apple's first foldable iPhone, which the company aims to launch in 2026, as the report states.

In contrast, the report highlights resilient demand for the iPhone 17 and iPhone 17 Pro despite trade tensions and weak smartphone sales. Apple is reportedly holding its 85–90 million unit target for the lineup as a whole while lifting production for the baseline iPhone 17 by about 5 million units and adding orders for the Pro model.

Regarding the disappointing sales of the iPhone Air, TechNews notes that while some users have given positive feedback on its battery life and overall user experience, demand in the high-end market is becoming saturated, and design differences alone are no longer enough to drive upgrades. The report, citing 9to5Google, adds that Samsung's ultra-thin Galaxy S25 Edge has faced similar sales pressure. Samsung has reportedly decided to cancel development of future Galaxy Edge models, with the current version to be discontinued once existing inventory is sold out.

➤ Apple Developing Long-Life Hydrogen Cell Battery for iPhone

Battery-related woes could be a thing of the past for Apple users.

The California tech giant have filed a patent application in the US for a new hydrogen energy cell that could reportedly power devices for "days or even week" without the need to refuel. It contains a fuel cell stack attached to a fuel cartridge and a fan that supplies oxygen

and cooling to the system, as well as an internal rechargeable battery. This patent is reportedly only relating to the MacBook series of laptops at present, but as reported in The Telegraph, a UK-based firm have fitted an iPhone 6 with a similar hydrogen fuel cell that can last up to a week between charges.

The pain of getting through the day on a single charge has long been the holy grail for iPhone users across the world. With more and more people using their smartphone for more and more things, this latest news could be the breakthrough we've all been looking for.

Surely it is only a matter of time before you will be able to play your favourite games on Ladylucks without fear of the dreaded '10% battery remaining' warning followed by a dash to the nearest plug socket, only to realise your charger is in your other bag!

The oft-reported lack of battery life has not stood in the way of Apple and the increasing popularity of their online App Store. After a record-breaking 2014, in which apps generated over \$10 billion in revenue for app developers, the store is going from strength to strength.

The range of apps available is staggering and covers pretty much everything you can possibly imagine, from educational offerings like language tutor Duolingo and astronomy site Starwalk to fun gaming apps such as strategy sim Stars Wars: Commander and online casino app Ladylucks, all of which are available to download right now.

So all in all Apple almost have the complete package, which is only really let down by the daily struggle to keep the power going. If the recent reports are to be believed, then there may be no stopping the biggest company in the world from just getting bigger and bigger! It remains to be seen what the many rivals such as Samsung and HTC, who seem to have embraced wireless charging recently, have up their sleeves to keep in the technology battle.

➤ Revolutionary Honor's Robot Phone 2026: The Amazing Smartphone with a Miniature Robotic Arm

Honor has shown off a smartphone that appears straight out of a sci-fi movie: a phone with a small robotic arm that can completely manipulate a retractable camera. Labeled the "Honor Robot Phone," the device is to be showcased for the first time at MWC (Mobile World Congress) in Barcelona in 2026.

A teaser released by the company reveals a rear camera module island that flips open to reveal a properly articulated arm supporting a detachable camera module. It is easy enough to explain, but it is a

striking sight. Honor plans to develop a phone that cannot take photos, but one that actually reaches out to help.

Honor has positioned the Robot Phone as a marriage of robotics and on-device Artificial Intelligence, and not a mere mechanical trick. The company says it plans to build a physical module with perception and decision-making software so the phone can behave like an assistant rather than a passive instrument.

The most obvious promise from the teaser is automatic subject tracking. The camera tracks individuals as they move, keeping them in frame without requiring the user to hold or reset the device. This would significantly simplify video recording, with use cases spanning various niches.

Aside from tracking, Honor's messaging suggests a future for the development of contextual intelligence. In the brief preview, the robotic camera appears to identify clothing and settings, providing information or modifying behavior depending on what it perceives. Essentially, vision models on the phone would allow the mechanical arm to determine which angles to take during shots or even look around obstructions, achieving something a static camera cannot.

Vivo's OriginOS 6: A Stunning "Blue River" Redesign That Redefines Smooth Performance

Vivo's OriginOS 6 has arrived like a polished ripple across the smartphone world, an update that is in equal parts a visual makeover and a technical upgrade. At first glance, the headlines focus on a glossy, "liquid glass" aesthetic that makes the system feel softer and more tactile.

Taking a deeper look, we find Vivo pitching something more ambitious: not just a fresh skin, but a rethinking of the Android system, with a new "Blue River" suite of optimizations. The combination of style and system is mainly why OriginOS 6 has become such a talking point among tech enthusiasts.

OriginOS 6 leans heavily into translucency, soft gradients, and motion that is designed to feel alive rather than merely decorative. Wallpapers have more depth and seem to breathe; the controls' and systems' surfaces use layered translucency to create a liquid, reflective look that many have compared to the latest iOS 16 design.

Vivo's designers are explicitly aiming for a more emotionally res-

onant interface, with things like ripple effects when a user plugs in a charger, or a subtle parallax on the lock screen, meant to give the system a tangible, physicality-driven feel. For users who have long compared Android vendor UIs to iOS, this is a vogueish answer by Vivo: familiar, but elastic and highly customizable.

But OriginOS 6 is not just a facelift. Vivo has introduced what it calls the "Blue River Smooth Engine," a suite of system-level optimizations that the company says rebuild Android's scheduling, rendering, and storage handling from the ground up. Vivo's messaging is clear: instead of applying superficial tweaks to make animation look smoother, they have targeted the root causes of perceived sluggishness, such as memory handling, I/O compression, and core scheduling, so that devices remain "fluent" long after first boot.

The company even points to third-party certifications to back its claim, presenting industry lab validation to support a "five-year smooth" promise for sustained user experience. Those are bold claims, and they are precisely what will invite hands-on testing and long-term reviews.

On the technical side, Vivo has been specific about measurable areas of improvement. The company describes an "internal" memory compression acceleration that can make said compression significantly faster, all the while reducing load on RAM. Other compute and rendering tweaks in demo conditions improved cold-start times and multi-app switching.

These are not just marketing buzzwords. If memory compression can indeed be achieved with lower overhead, phones could keep more applications on standby without excessive RAM usage, a concrete advantage for multitaskers and gamers alike. Still, carrier models, regional builds, and the chipsets inside each phone will determine how much of that promise filters down to real users.

AI is where Vivo is trying to make the OriginOS 6 feel more practical. The company is pushing "smaller" on-device models, tools that are compact enough to run locally, but powerful enough to handle multi-modal tasks like voice, image, and text understanding. Vivo's "Blue Heart" model matrix and the upgraded "Little V" assistants are meant to do more than answer queries: they are built to handle most of the work.

Those features are in line with the industry trend toward on-device AI that preserves privacy and reduces latency, but their polish will depend on how well Vivo balances model size, accuracy, and battery draw.

- ◆ Zoom range: 24-720 mm eqv
- ◆ Shutter range: 4-1/2000 sec
- ◆ Movie Clips: 4k 30 fps
- ◆ LCD: 3.0" 1,840,000 dots
- ◆ Battery: Lithium Ion DMW-BLG10
- ◆ Storage: SD/SDHC/SDXC (UHS-I) Card
- ◆ Size: 112 x 68 x 43 mm 322g

Canon PowerShot SX70 HS

- ◆ Effective pixels: 20.0 Million BSI CMOS
- ◆ Built-in Wi-Fi and Bluetooth
- ◆ Zoom range: 21-1365 mm eqv
- ◆ Shutter range: 15-1/2000 sec
- ◆ Image Stabilizer: Optical
- ◆ LCD: 3.0" 922,000 dots
- ◆ Battery: Lithium Ion LP-E12
- ◆ Storage: SD/SDHC/SDXC (UHS-I) Card
- ◆ Size: 127 x 91 x 117 mm 608g

Leica C-Lux

- ◆ Effective pixels: 20.0 Million 1" BSI CMOS
- ◆ Built-in Wi-Fi and Bluetooth
- ◆ Zoom range: 24-360 mm eqv
- ◆ Shutter range: 60-1/2000 sec
- ◆ Image stabilizer: Optical
- ◆ LCD: 3.0" 1,240,000 dots
- ◆ Battery: Lithium Ion Rechargeable
- ◆ Storage: SD/SDHC/SDXC (UHS-I) Card
- ◆ Size: 13 x 67 x 46 mm 340g

Fujifilm S9900W

- ◆ Effective pixels: 16.0 million BSI-CMOS
- ◆ Built-in Wi-Fi
- ◆ Zoom range: 24-1200 mm eqv
- ◆ Shutter range: 8-1/1700 sec
- ◆ Image stabilizer: Optical
- ◆ LCD: 3.0" 460,000 dots
- ◆ Battery: 4X AA Batteries
- ◆ Storage: SD/SDHC/SDXC Card
- ◆ Size: 123x87x116mm, 670g

Minolta MN67Z

- ◆ Effective pixels: 20.0 Million CMOS
- ◆ Built-in Wi-Fi
- ◆ Zoom range: 23-1568 mm eqv
- ◆ Shutter range: 30-1/2000 sec
- ◆ Movie Clips: 4k 30 fps
- ◆ LCD: 3.0" 920,000 dots
- ◆ Battery: Lithium Ion Rechargeable
- ◆ Storage: SD/SDHC Card
- ◆ Size: 124 x 89 x 114 mm 626g

Olympus Stylus SH-3

- ◆ Effective pixels: 16.0 million BSI-CMOS
- ◆ Built-in Wi-Fi
- ◆ Zoom range: 25-600 mm eqv
- ◆ Shutter range: 30-1/2000 sec
- ◆ Image stabilizer: 5-axis
- ◆ LCD: 3.0" 460,000 dots
- ◆ Battery: Lithium-Ion LI-92B
- ◆ Storage: SD/SDHC/SDXC Card
- ◆ Size: 109x63x42mm, 271g

Ricoh GR IV

- ◆ Effective pixels: 26.0 Million CMOS
- ◆ Built-in Wi-Fi
- ◆ Zoom range: 28 mm eqv
- ◆ Shutter range: 30-1/4000 sec
- ◆ Movie Clips: 1980 x 1080 60fps
- ◆ LCD: 3.0" 1,036,000 dots
- ◆ Battery: Lithium-Ion DB-120
- ◆ Storage: microSD Card
- ◆ Size: 109 x 61 x 33 mm 262g

Sony ZV-1 mark II

- ◆ Effective pixels: 20.0 Million BSI-CMOS
- ◆ Built-in Wi-Fi and Bluetooth
- ◆ Zoom range: 18-50 mm eqv
- ◆ Shutter range: 1-1/32000 sec
- ◆ Movie Clips: 4K 30fps
- ◆ LCD: 3.0" 921,600 dots
- ◆ Battery: Lithium-Ion NP-BX1
- ◆ Storage: MS XC-HG Duo/SDXC (UHS-I) Card
- ◆ Size: 106 x 60 x 47 mm 292g

OM System Tough TG-7

- ◆ Effective pixels: 16.0 Million BSI-CMOS
- ◆ Waterproof, Freezeproof, Shockproof
- ◆ Zoom range: 25-100 mm eqv
- ◆ Shutter range: 4-1/2000 sec
- ◆ Movie clips: 4K 30fps
- ◆ LCD: 3.0" 1,040,000 dots
- ◆ Battery: Lithium-Ion LI-92B
- ◆ Storage: SD/SDHC/SDXC Card
- ◆ Size: 114 x 66 x 33 mm 330g

Pentax WG-8

- ◆ Effective pixels: 20.0 Million CMOS
- ◆ Waterproof, Freezeproof, Shockproof
- ◆ Zoom range: 28-140 mm eqv
- ◆ Shutter range: 4-1/4000 sec
- ◆ 6 Macro LED lights with 5 levels brightness
- ◆ LCD: 3.0" 1,040,000 dots
- ◆ Battery: Lithium-Ion DB-110
- ◆ Storage: SD/SDHC/SDXC Card
- ◆ Size: 118 x 66 x 33 mm 242g

Insta 360 X5

- ◆ Effective pixels: 72.0 Million CMOS
- ◆ Waterproof down to 15M
- ◆ FlowState Stabilization & 360° Horizon Lock
- ◆ Shutter range: 120-1/8000 sec
- ◆ Movie Clips: 8K 30fps
- ◆ LCD: 2.7" Touchscreen
- ◆ Battery: Lithium-Ion Rechargeable
- ◆ Storage: micro SD/SDHC/SDXC Card
- ◆ Size: 46.0 x 124.5 x 38.2 mm 200g

Ricoh G900 II

- ◆ Effective pixels: 20.0 Million BSI-CMOS
- ◆ Waterproof, Freezeproof, Shockproof
- ◆ Zoom range: 28-140 mm eqv
- ◆ Shutter range: 1/4-1/4000 sec
- ◆ 6 Macro LED lights with 5 levels brightness
- ◆ LCD: 3.0" 1,040,000 dots
- ◆ Battery: Lithium-Ion DB-110
- ◆ Storage: SD/SDHC/SDXC Card
- ◆ Size: 118 x 66 x 33 mm 242g

Canon PowerShot V1

- ◆ Effective pixels: 22.0 Million CMOS
- ◆ Cooling fan for video recording
- ◆ Zoom range: 18-50 mm eqv
- ◆ Shutter range: 30-1/2000 sec
- ◆ Movie Clips: 4K 30fps
- ◆ LCD: 3.0" 1,040,000 dots
- ◆ Battery: Lithium-Ion LP-E17
- ◆ Storage: SD/SDHC/SDXC (UHS-II) Card
- ◆ Size: 118 x 68 x 53 mm 426g

Panasonic Lumix DC-LX100 II

- ◆ Effective pixels: 17.0 Million 4/3" CMOS
- ◆ Built-in Wi-Fi and Bluetooth
- ◆ Zoom range: 24-75 mm eqv
- ◆ Shutter range: 60-1/4000 sec
- ◆ Aperture range: F1.7-F2.8
- ◆ LCD: 3.0" 1,240,000 dots
- ◆ Battery: Lithium-Ion DMW-BLE9
- ◆ Storage: SD/SDHC/SDXC (UHS-I) Card
- ◆ Size: 115 x 66 x 64 mm 392g

Leica D-Lux 8

- ◆ Effective pixels: 17.0 Million CMOS
- ◆ Aperture range: F1.7-2.8
- ◆ Zoom range: 24-75 mm eqv
- ◆ Shutter range: 1800-1/4000 sec
- ◆ Movie Clips: 4K 30fps
- ◆ LCD: 3.0" 1,840,000 dots
- ◆ Battery: Lithium-Ion DP-DC15
- ◆ Storage: SD/SDHC/SDXC (UHS-I) Card
- ◆ Size: 130 x 69 x 82 mm 397g

GoPro Hero 13 Black

- ◆ Effective pixels: 27.0 Million CMOS
- ◆ Waterproof down to 10M
- ◆ Interchangeable Wideangle/Macro/ND Lens
- ◆ Hypersmooth 6.0 with Autoboot Stabilization
- ◆ Movie Clips: 5.3K 60fps
- ◆ LCD: 2.27" Touchscreens
- ◆ Battery: Lithium-Ion Rechargeable
- ◆ Storage: micro SD/SDHC/SDXC Card
- ◆ Size: 71.8 x 50.8 x 33.6 mm 121g

DJI Osmo Action 5 Pro

- ◆ Effective pixels: 72.0 Million CMOS
- ◆ Waterproof down to 20M without a case
- ◆ AI subject tracking & stay centered
- ◆ Shutter range: 30-1/8000 sec
- ◆ Movie Clips: 4K 60fps
- ◆ LCD: 2.5" 285,000 dots
- ◆ Battery: Lithium-Ion Rechargeable
- ◆ Storage: micro SD/SDHC/SDXC Card
- ◆ Size: 70.5 x 44.2 x 32.8 mm 146g

Fujifilm X100 VI

- ◆ Effective pixels: 40.0 Million BSI-CMOS
- ◆ Built-in Wi-Fi and Bluetooth
- ◆ Zoom range: 35 mm eqv
- ◆ Shutter range: 15-1/4000 sec
- ◆ Movie Clips: 6.2K 30fps
- ◆ LCD: 3.0" 1,620,000 dots
- ◆ Battery: Lithium-Ion NP-W126S
- ◆ Storage: SD (UHS-I) Card
- ◆ Size: 128 x 75 x 55 mm 521g

Fujifilm X half

- ◆ Effective pixels: 18.0 Million BSI-CMOS
- ◆ Built-in 13 film simulation modes
- ◆ Zoom range: 32 mm eqv
- ◆ Shutter range: 900-1/2000 sec
- ◆ Movie Clips: 1080 24fps
- ◆ LCD: 2.4" 920,000 dots
- ◆ Battery: Lithium-Ion NP-W126S
- ◆ Storage: SD/SDHC/SDXC (UHS-I) Card
- ◆ Size: 106 x 64 x 30 mm 240g
